Gyroscope

Gyroscope: a device for measuring or maintaining orientation Example: Classical Gyroscope

Classical Gyroscope

MOVIE: How to work classical gyroscope

Classical Gyroscope

MOVIE: How to work classical gyroscope Based on the conservation of angular momentum

Classical Gyroscope: airplane sensor

Sperry vertical gyro for Boeing 747 (airplane)

Figure: ring laser gyro (from Encyclopedia Britannica)

Based on the relativity

Figure: ring laser gyro (from Encyclopedia Britannica)

Based on the relativity Used in Boeing 777,787; Airbus A320 330/340,A380 etc.(airplane); Atlas I/II/III/V, H-IIA/B etc.(rocket)

Figure: Light traveling opposite directions

Rotating circular ring

R : radius, ω : angular velocity, c : speed of light (1) A light source emits in both directions from one point on the ring

 Light traveling in the same direction as the rotation It needs a catch up time t₁ as

$$t_1 = \frac{2\pi R + \Delta L}{c} \tag{2}$$

 ΔL : distance of rotating ring in the interval t_1

$$\Delta L = R\omega t_1 \tag{3}$$

 Light traveling in the same direction as the rotation It needs a catch up time t₁ as

$$t_1 = \frac{2\pi R + \Delta L}{c} \tag{2}$$

 ΔL : distance of rotating ring in the interval t_1

$$\Delta L = R\omega t_1 \tag{3}$$

Therefore

$$t_1 = \frac{2\pi R}{c - R\omega} \tag{4}$$

 Light traveling in the same direction as the rotation It needs a catch up time t₁ as

$$t_1 = \frac{2\pi R + \Delta L}{c} \tag{2}$$

 ΔL : distance of rotating ring in the interval t_1

$$\Delta L = R\omega t_1 \tag{3}$$

Therefore

$$t_1 = \frac{2\pi R}{c - R\omega} \tag{4}$$

Light traveling in the opposite direction as the rotation

$$t_2 = \frac{2\pi R}{c + R\omega} \tag{5}$$

The time difference:

$$\Delta t = t_1 - t_2 = \frac{4\pi R^2 \omega}{c^2 - R^2 \omega^2}$$
(6)

◆□→ ◆圖→ ◆注→ ◆注→ □注

The time difference:

$$\Delta t = t_1 - t_2 = \frac{4\pi R^2 \omega}{c^2 - R^2 \omega^2}$$
(6)

イロン イヨン イヨン イヨン 三日

8/21

For
$$R\omega = v \ll c$$

$$\Delta t \approx \frac{4\pi R^2 \omega}{c^2} = \frac{4A\omega}{c^2}$$
(7)

where $A = \pi R^2$ is the area of the ring.
